Jeffrey B. Harvey Joins Brain Aneurysm Foundation Board of Directors

The Brain Aneurysm Foundation is pleased to announce that Jeffrey B. Harvey of Buffalo, New York, has joined its Board of Directors.

Mr. Harvey is the CFO of Tonus Therapeutics, a biotech company in Williamsville, New York whose goal is the development of drugs that are active for diseases that involve biomechanics. The primary target is muscular dystrophy, the most common fatal genetic disease among boys.

Tonus Therapeutics is based on the work of Frederick Sachs, PhD, and his collaborators at the State University of New York (SUNY) at Buffalo, Thomas Suchyna, PhD, and Philip Gottlieb, PhD. The company was founded in 2009 by Mr. Harvey and Drs. Sachs, Suchyna, and Gottlieb. Mr. Harvey also helped start Neurovascular Diagnostics, a small company that is working on a blood test to detect brain aneurysms.

Mr. Harvey's wife, Carol, died 15 years ago of complications following treatment for a brain aneurysm. In the years since her death, Mr. Harvey helped establish Buffalo's first brain aneurysm support group with guidance from the Brain Aneurysm Foundation. "It's important for patients and family members to have a place to learn and share their experiences," said Mr. Harvey.

Mr. Harvey joined the foundation's board to help further its mission of raising awareness of brain aneurysms, educating the public and healthcare professionals about the disease, and supporting research of brain aneurysm prevention, detection, and treatment.

"There have been many improvements in treatment since my wife died, but far too many people still die or have lifelong disabilities from brain aneurysms," said Mr. Harvey. "Through the Brain Aneurysm Foundation we are working to make further

progress so that fewer people have to suffer.”

ABOUT THE BRAIN ANEURYSM FOUNDATION

Founded in Boston and now based in Hanover, Massachusetts, the Brain Aneurysm Foundation is the globally recognized leader in brain aneurysm awareness, education, support, advocacy, and research funding.

The foundation’s mission is to provide information about and raise awareness of the symptoms and risk factors of brain aneurysms to prevent ruptures and subsequent death and disability; work with medical communities to provide support networks for patients and families; and advance research to improve patients’ outcomes and save lives.

Established in 1994, the foundation is led by Executive Director Christine Buckley and has a Medical Advisory Board that comprises more than 30 of the nation’s foremost aneurysm experts — neurologists, neurosurgeons, interventional neuroradiologists, and other brain aneurysm specialists — from the country’s leading hospitals and universities.
